STOCKS/ETFs/ETCs Margin Trading Terms

Version 1.0.1, Dated 3 November 2026

1. Introduction to these Terms

1.1. Scope. The following "Stocks/ETFs/ETCs Margin Trading Terms" set out the additional Terms & Conditions applicable when you borrow Crypto-Assets to enter into "Stocks/ETFs/ETCs Margin Trades" accessible via the "Bitpanda Platform".

1.2. Overview. Bitpanda enables customers eligible pursuant to Clause 2.2 to enter into Stocks/ETFs/ETCs Margin Trades for a so-called "Leverage Buy" trade in Stocks/ETFs/ETCs. With a Leverage Buy Stocks/ETFs/ETCs Margin Trade, the customer seeks to gain leveraged exposure in a specific Stocks/ETFs/ETCs by borrowing Crypto-Assets (particularly EMTs like EURCV) from Bitpanda GmbH for a Buy Order in Stocks/ETFs/ETCs. The customer will secure Bitpanda's repayment claim for the Borrowed Crypto-Asset including accrued Daily Fees by pledging certain assets to Bitpanda as collateral.

1.3. Contracting Party. Borrowing, under these Stocks/ETFs/ETCs Margin Trading Terms, is provided by Bitpanda GmbH, and these Stocks/ETFs/ETCs Margin Trading Terms are entered into between (i) Bitpanda GmbH ("Bitpanda") as lender and secured party and (ii) you (as borrower and pledgor). "Bitpanda Financial Services GmbH" and, where applicable, "Bitpanda Financial Services Berlin Branch" provide execution-only services for Orders in Stocks/ETFs/ETCs, including the Buy Order and the Liquidation Order, in each case in accordance with the "Financial Services Terms". For the avoidance of doubt, lending to crypto-asset customers of Bitpanda GmbH Berlin Branch under these STOCKS/ETFs/ETCs Margin Trading Terms is provided by Bitpanda GmbH.

1.4. In addition to the STOCKS/ETFs/ETCs Margin Trading Terms, the general provisions of your "User Agreement" and the "Crypto-Asset Terms" apply.

1.5. Conflict of terms. In the event of a conflict between these STOCKS/ETFs/ETCs Margin Trading Terms and the User Agreement or other "Product Terms", the provisions of these STOCKS/ETFs/ETCs Margin Trading Terms shall prevail for any STOCKS/ETFs/ETCs Margin Trade you enter into.

1.6. Definitions. The Definitions shall have the meanings ascribed to them in the Annex ("Definitions") to these STOCKS/ETFs/ETCs Margin Trading Terms.

1.7. "Stocks/ETFs/ETCs Margin Trade" means a Leveraged Buy transaction entered into by a customer through the Bitpanda Platform in respect of a Stock, ETF, or ETC, under which Bitpanda lends Borrowed Crypto-Asset to the customer solely to finance part of the purchase price of the relevant Stock, ETF, or ETC Buy Order. The customer will have to use own funds in addition to Borrowed Crypto-Asset, when placing a Buy Order for the relevant Stock, ETF, or ETC with Bitpanda Financial Services and, where applicable, its Branch, on an execution-only basis under the Financial Services Terms. The customer's repayment obligations of Borrowed Crypto-Asset under the Stocks/ETFs/ETCs Margin Trade are secured by collateral.

2. Available Stocks/ETFs/ETCs and Eligible Customers

2.1. Available Stocks/ETFs/ETCs. A list of Stocks/ETFs/ETCs available for Stocks/ETFs/ETCs Margin Trades including the available Leverage Levels and the applicable Liquidation Thresholds can be found here: https://www.bitpanda.com/en/margin-trading-stocks#list-of-assets. Bitpanda may amend applicable Leverage Levels and the Liquidation Thresholds for the future by publishing this on its website.

2.2. Eligible customers. Stocks/ETFs/ETCs Margin Trades are subject to certain eligibility restrictions. You must meet or exceed any minimum collateral requirements imposed by Bitpanda to qualify for Stocks/ETFs/ETCs Margin Trades and fulfil additional requirements that Bitpanda Financial Services imposes under the Financial Services Terms.

2.3. Discretion of Bitpanda to exclude customers. Bitpanda reserves the right to exclude customers resident in specific countries or not eligible for other legal or regulatory reasons from entering into Stocks/ETFs/ETCs Margin Trades.

3. Borrowing and use of Borrowed Crypto-Asset

3.1. Borrowing. Upon conclusion of the Stocks/ETFs/ETCs Margin Trade in accordance with Clause 4 below, Bitpanda lends you Borrowed Crypto-Asset solely to finance part of the purchase price of a selected Stocks/ETFs/ETCs Buy Order.

3.2. Limitation of usage of Borrowed Crypto-Assets. Borrowed Crypto-Assets may only be used to settle the purchase price (including applicable fees, if any) owed by you to Bitpanda Financial Services for the selected Stocks/ETFs/ETCs Buy Order. Borrowed Crypto-Assets cannot be withdrawn or used for other products or services.

3.3. Bitpanda is under no obligation to lend additional Crypto-Assets to users who have entered into a Stocks/ETFs/ETCs Margin Trade. The functionality ‘add to position’ may thus be disabled at any time for specific or all Stocks/ETFs/ETCs Margin Trades.

4. Offer Process, Buy Order and Customer Instructions

4.1. Offer Process. On the Bitpanda Platform you may initiate a Stocks/ETFs/ETCs Margin Trade by undertaking the following steps:

4.1.1. If you wish to enter into a Stocks/ETFs/ETCs Margin Trade on the Bitpanda Platform, you first need to submit an "offer" for conclusion of a Stocks/ETFs/ETCs Margin Trade via the Bitpanda Platform for a Leverage Level that you choose, whereby the principles described in Clause 4.4 of the User Agreement on the offer process will also apply to this offer ("Offer for a Stocks/ETFs/ETCs Margin Trade").

4.1.2. Leverage Level. You can choose a leverage level, which is the multiplier that determines the relationship between your own funds and the amount of Borrowed Crypto-Asset used to finance the relevant Stocks/ETFs/ETCs Buy Order ("Leverage Level"). Bitpanda will provide you with the information which Leverage Levels are available for which Stocks/ETFs/ETCs Margin Trade. Based on your chosen amount of Leverage Level the amount of Borrowed Crypto-Assets is determined by you and you are required to provide Collateral and Additional Collateral to secure Bitpanda’s repayment claim for the specified amount of Borrowed Crypto-Asset that you borrow.

4.1.3. An Offer for a Stocks/ETFs/ETCs Margin Trade will also include the following components:

i. An offer (*Angebot*) by you to enter into a Borrowing Transaction (as defined in Clause 4.1.5) with Bitpanda;
ii. You entering into the Pledge Agreement (as defined in Clause 10.1 below) and the Additional Pledge Agreement (as defined in Clause 11.1 below) with Bitpanda;
iii. An undertaking by you to place a Buy Order (as defined in Clause 4.1.6 below) and to instruct a Liquidation Order (as described in Clause 9 below) with Bitpanda Financial Services.

4.1.4. Selected Stocks/ETFs/ETCs. When you submit an Offer for a Stocks/ETFs/ETCs Margin Trade you will specify the selected Stocks/ETFs/ETCs that should be subject to the Stocks/ETFs/ETCs Margin Trade and the Leverage Level determining the amount of Borrowed Crypto-Asset.

4.1.5. Borrowing Transaction. As part of a Stocks/ETFs/ETCs Margin Trade, Bitpanda lends you a specified amount of a Crypto-Assets ("Borrowed Crypto-Asset"), e.g. EURCV, and charges Daily Fees, provided that you enter into a Pledge Agreement, the Additional Pledge Agreement and instruct a Liquidation Order ("Borrowing Transaction").

4.1.6. Buy Order. As part of a Stocks/ETFs/ETCs Margin Trade, you are required to place a buy "RFQ Order" with Bitpanda Financial Services or, where applicable, Bitpanda Financial Services Berlin Branch for the purchase of the selected Stocks/ETFs/ETCs on an execution-only basis in accordance with the Financial Services Terms ("Buy Order").

4.1.7. The Borrowing Transaction and the Buy Order are commercially linked. Bitpanda will provide the Borrowed Crypto-Asset only for the purpose of enabling you to finance part of the Buy Order.

4.1.8. In the course of the transaction your Borrowed Crypto-Assets will be exchanged for E-Money so that you can invest into Stocks/ETFs/ETCs ("Swap"). This Swap is facilitated in accordance with the standard procedures applicable to enter into a Transaction under which you receive your requested and firm amount of E-Money in exchange for a sale of a specified amount of Crypto-Assets according to Clause 3.3 of the Crypto-Assets Terms.

4.2. Acceptance of your Offer for a Stocks/ETFs/ETCs Margin Trade. Bitpanda may accept your Offer for a Stocks/ETFs/ETCs Margin Trade in whole, and not in parts. A Stocks/ETFs/ETCs Margin Trade is concluded only when Bitpanda accepts your Offer for a Stocks/ETFs/ETCs Margin Trade by fulfilment of the Borrowing Transaction.

5. Maturity, Repayment and Due Date Events of Borrowed Crypto-Assets

5.1. Maturity. The Borrowing Transaction has no fixed term, scheduled maturity date or maximum holding period.

5.2. Voluntary repayment. You may repay Borrowed Crypto-Asset and pay accrued Daily Fees at any time through the repayment functionality made available on the Bitpanda Platform. Partial repayment of the Borrowed Crypto-Asset including pro rata accrued Daily Fees is possible.

5.3. Due date events. The Borrowed Crypto-Asset and accrued Daily Fees become immediately due and payable:

(i) if the Margin Level (as defined in Clause 7.3 below) of the Stocks/ETFs/ETCs reaches or falls below the required Margin Level, thus reaching or falling below the Liquidation Threshold,

(ii) upon an upcoming corporate action event for a stock, provided that you are informed by Bitpanda Financial Services about this event

(each such event a "Due Date Event").

Bitpanda will inform you via the Bitpanda Platform and per e-mail of a Due Date Event.

5.4. Repayment following a Due Date Event. Upon the occurrence of a Due Date Event, you must repay the Borrowed Crypto-Asset and pay accrued Daily Fees immediately. Bitpanda may charge late interest fees at the rate of 4 % per annum on the outstanding amount until full repayment is received.

5.5. Effect of repayment. Upon full repayment of the Borrowed Crypto-Asset and payment of accrued Daily Fees Bitpanda must release the Collateral and the Additional Collateral from the pledge. Partial repayment will not affect, or result in a release of Collateral but will influence the Liquidation Threshold, since the outstanding Borrowed Crypto-Asset value used to calculate the Margin Level (see Clause 7.3) will be reduced. The required Amount of Additional Collateral will be reduced.

6. Termination by Bitpanda

6.1. Termination. Bitpanda may terminate the Borrowing Transaction and require repayment of the Borrowed Crypto-Assets and accrued Daily Fees (i) by way of ordinary termination according to Clause 6.2 by giving reasonable notice and (ii) by way of termination for important reason (*wichtiger Grund*) according to Clause 6.3.

6.2. Ordinary termination. Where termination is not for an important reason, Bitpanda will provide a reasonable prior notice period before terminating the Borrowing Transaction with the effect that the Borrowed Crypto-Assets and accrued Daily Fees become due and payable. Reasonable notice means a period appropriate to the circumstances and generally not less than 14 calendar days, taking into account the size of the relevant Stocks/ETFs/ETCs position, prevailing market conditions, the amount of Borrowed Crypto-Asset and the customer's legitimate interests. During the notice period, Daily Fees continue to accrue and Collateral and Additional Collateral remain.

6.3. Termination for an important reason. Bitpanda may terminate the Borrowing Transaction immediately upon written notice to you with the effect that the Borrowed Crypto-Assets and accrued Daily Fees shall become immediately due and payable, if an important reason (*ein wichtiger Grund*) exists. An important reason shall be deemed to exist, in particular, upon the occurrence of any of the following:

6.3.1. if the current position value of the Stocks/ETFs/ETCs forming part of the Stocks/ETFs/ETCs Margin Trade reaches or falls below the Liquidation Threshold applicable to the Stocks/ETFs/ETCs;

6.3.2. any event that materially and adversely affects the value, tradability, or enforceability of the Collateral, or the ability to execute transactions under the Financial Services Terms and which is not of short temporary nature;

6.3.3. the delisting or permanent discontinuation of the Stocks/ETFs/ETCs forming part of the Stocks/ETFs/ETCs Margin Trade from trading on the Trading Venue;

6.3.4. the imposition of a trading suspension in respect of the Stocks/ETFs/ETCs forming part of the Stocks/ETFs/ETCs Margin Trade; or

6.3.5. suspected fraud or misuse of the Bitpanda Platform;

6.3.6. you fail to maintain Additional Collateral in the required Additional Collateral Amount (as defined in Clause 11.1 below).

6.4. Effect of Termination. Upon expiry of the reasonable notice period (ordinary termination) or upon effectiveness of a termination for an important reason, the Borrowed Crypto-Assets and accrued Daily Fees become due and payable. If you do not repay Borrowed Crypto-Assets and accrued Daily Fees when they are due, Bitpanda may enforce and realise the Collateral and/or the Additional Collateral in accordance with these Stocks/ETFs/ETCs Margin Trading Terms and the Pledge Agreement and the Additional Pledge Agreement.

6.5. Notification of Termination. Bitpanda will notify you of any termination via the Bitpanda Platform and per e-mail. All rights and remedies under these Stocks/ETFs/ETCs Margin Trading Terms remain unaffected. Termination does not affect the Liquidation Order (as described in Clause 9 below) placed with Bitpanda Financial Services.

7. Margin Level and Liquidation Threshold

7.1. Isolated Margin. A "Leverage Position" on the Bitpanda Platform indicates the amount of leverage you use to enter into a Stocks/ETFs/ETCs Margin Trade. Each Leverage Position for a specific Stocks/ETFs/ETCs Margin Trade is considered isolated, meaning that only the leverage and position value attributable to this Leverage Position is relevant for the calculation of the margin level pursuant to Clause 7.2.

7.2. Margin Level and Liquidation Threshold. For the duration of a Stocks/ETFs/ETCs Margin Trade, you must maintain a Margin Level above the Liquidation Threshold. The Margin Level calculation is isolated from your balance on your Account and is calculated according to the formula under Clause 7.3. The minimum Margin Level for a specific Stocks/ETFs/ETCs is referred to as Liquidation Threshold and is published here https://www.bitpanda.com/en/margin-trading-stocks#list-of-assets ("Liquidation Threshold").

7.3. Formula for calculating the Margin Level. The Margin Level measures the ratio between the current position value of the Stocks/ETFs/ETCs forming part of the Stocks/ETFs/ETCs Margin Trade and the value of the outstanding Borrowed Crypto-Asset including accrued Daily Fees you owe to Bitpanda for each individual Stocks/ETFs/ETCs Margin Trade (thus, per ISIN) and is calculated as follows ("Margin Level"):

$$\text{Margin Level} = \frac{\text{current EUR position value of Stocks/ETFs/ETCs}}{\text{outstanding Borrowed Crypto-Asset value + accrued Daily Fees}}$$

The current position value of the Stocks/ETFs/ETCs is calculated using mid prices from the Trading Venue during its trading hours. The outstanding Borrowed

Crypto-Asset value is calculated using market prices published on the Bitpanda Platform. One (1) EURCV always equals one (1) EUR.

IMPORTANT: You must thus ensure that the EUR position value of your Stocks/ETFs/ETCs forming part of the Stocks/ETFs/ETCs Margin Trade is sufficient to secure the outstanding balance of the Borrowed Crypto-Asset plus accrued Daily Fees, without causing your Margin Level to reach or fall below the Liquidation Threshold (as defined in Clause 7.2 above).

Example margin level calculation. A customer enters into a 10x SAMPLE STOCK leverage buy transaction of EUR 10,000 composed of EUR 1,000 own funds of the customer and Bitpanda borrows to the customer an amount of 9,000 EURCV. The Margin Level is 10,000:9,000, in other terms approximately 1.11 (excl. fees, taxes, etc.). Daily Fees will influence the Margin Level and if such fees were included in the above example, Daily Fees for 24 hours would reduce the Margin Level to approximately 1.109. Moreover the value of the Stocks/ETFs/ETCs using mid prices influences the Margin Level. If the value of the Stocks/ETFs/ETCs drops, the Margin Level is reduced.

7.4. Risk Indicators. The interface on the Bitpanda Platform will provide you with colour coded risk indicators and the indicative liquidation price. The indicative liquidation price is calculated on an ongoing basis for each Leverage Position using the Trading Venue's price feed's mid prices. This is an additional service and assistance by Bitpanda to allow you to keep track of your Margin Level and the Liquidation Threshold. It remains your sole responsibility to manage your Leverage Positions and if necessary, take respective actions to actively manage your risks.

8. Margin Call

8.1. Margin Call. Before the Margin Level reaches the Liquidation Threshold ("Margin Call Threshold"), Bitpanda will use its best efforts to inform you via e-mail and a push notification that the outstanding amount of Borrowed Crypto-Asset plus accrued Daily Fees must be repaid in full or in part sufficient to restore the Margin Level above the Liquidation Threshold, if you do not want (i) Bitpanda to terminate the Borrowing Transaction for important reason and (ii) the Liquidation Order to be triggered. This information is referred to as "Margin Call" and shall not be reissued within a four (4) hour period following the initial notification, unless you took an action in response to the Margin Call, in which case a new Margin Call may be issued. The Margin Call Thresholds are published here https://www.bitpanda.com/en/margin-trading-stocks#list-of-assets.

8.2. You are solely responsible for monitoring and maintaining the Margin Level above the corresponding Liquidation Threshold.

9. Liquidation Order

9.1. Liquidation Order Instruction. Upon entering into a Stocks/ETFs/ETCs Margin Trade, you are required to instruct a Liquidation Order with Bitpanda Financial Services pursuant to Clause 7.7 of the Financial Services Terms ("Liquidation Order"). You must further instruct Bitpanda Financial Services to pay the sell amount received from the execution of the Liquidation Order to Bitpanda, who shall exchange any amount received into Crypto-Assets to repay Borrowed Crypto-Asset and accrued Daily Fees.

10. Collateral - Pledge Agreement (*Pfandbestellungsvertrag*)

10.1. Pledge Agreement. To enter into a Stocks/ETFs/ETCs Margin Trade, you must agree to the following Pledge Agreement in the customer journey when submitting the Offer for the relevant Stocks/ETFs/ETCs Margin Trade and upon placing the Buy Order ("Pledge Agreement"):

> *"By confirming this **Pledge Agreement**, I grant Bitpanda GmbH, Stella-Klein-Löw-Weg 17, 1020 Vienna, Austria, registered with the commercial register of the commercial court Vienna under FN 569240v ("**Bitpanda**"), a first-ranking pledge (Pfandrecht) (the "**Pledge**") over the Stocks, ETFs and ETCs acquired through the Buy Order (including any part financed by my own contribution), and over all ancillary and related rights, claims, custody claims, proceeds and substitute assets (together, "**Collateral**").*
>
> *Secured Obligations. The Collateral secures all claims of Bitpanda against me arising from or in connection with the Borrowed Crypto-Asset forming part of the Stocks/ETFs/ETCs Margin Trade, including repayment of principal in the form of Borrowed Crypto-Asset and accrued Daily Fees (the "**Secured Obligations**").*
>
> *Notification. I hereby instruct Bitpanda GmbH to notify Bitpanda Financial Services GmbH* including Bitpanda Financial Services Berlin Branch, *in its capacity as custodian of the Collateral, of this Pledge and instruct Bitpanda Financial Services GmbH and its Branch to (a) henceforth hold the Collateral as agent also for Bitpanda as secured party under the Pledge (Besitzanweisung), (b) mark the Collateral in its books and accounts as being pledged in first rank to Bitpanda (Pfandvermerk), (c) to restrict any withdrawal, transfer or other disposal of the Collateral except as permitted under the Stocks/ETFs/ETCs Margin Trading Terms and (d) upon receipt of a notice by Bitpanda that the Collateral may be enforced, to dispose of the Collateral as instructed by Bitpanda.*
>
> *No withdrawal. I may not withdraw, transfer, pledge or encumber the Collateral while any Borrowed Crypto-Asset and accrued Daily Fees remain outstanding under the Borrowing Transaction.*
>
> *No Release. The current EUR position value of the pledged Stocks/ETFs/ETCs influences the Margin Level and I can better the Margin Level by partially repaying Borrowed Crypto-Asset. As a consequence, Bitpanda shall not release the Collateral until full repayment of Borrowed Crypto-Asset and accrued Daily Fees.*
>
> *Enforcement. The Collateral may be enforced by Bitpanda once the Secured Obligations have become due (fällig) under the Stocks/ETFs/ETCs Margin Trading Terms and have not been discharged by me after their due date (Pfandreife). In such an event, Bitpanda may realise the Collateral out-of-court (außergerichtlich) by private sale (Freihandverkauf). To this end, Bitpanda shall send a notice to Bitpanda Financial Services GmbH stating that the Secured Obligations have become due (fällig) and instruct Bitpanda Financial Services GmbH to sell the Collateral on the Trading Venue at the prevailing stock-exchange price on Bitpanda's behalf and to remit the sales proceeds to Bitpanda. Bitpanda may apply the proceeds – converting any EUR amount received into Crypto-Assets of the same type as the Borrowed Crypto-Asset – towards repayment of the Borrowed Crypto-Asset and accrued Daily Fees. Any surplus remaining after full discharge of Bitpanda's claims under the Borrowing Transaction shall be released or credited to me."*

10.2. The pledge does not transfer ownership of the Collateral to Bitpanda.

10.3. The Pledge Agreement (*Pfandbestellungsvertrag*) can be downloaded in the course of the customer journey and will be provided on a durable medium together with the borrowing confirmation by e-mail.

11. Additional Collateral - Additional Pledge Agreement (*Zusätzlicher Pfandbestellungsvertrag*)

11.1. Additional Pledge Agreement. To enter into a Stocks/ETFs/ETCs Margin Trade, you must further agree to the following Additional Pledge Agreement in the customer journey when submitting the Offer for the relevant Stocks/ETFs/ETCs Margin Trade and upon placing the Buy Order:

> *"By confirming this **Additional Pledge Agreement**, I grant Bitpanda GmbH, Stella-Klein-Löw-Weg 17, 1020 Vienna, Austria, registered with the commercial register of the Commercial Court Vienna under FN 569240v ("**Bitpanda**"), a first-ranking pledge (Pfandrecht) (the "**Additional Pledge**") over (i) E-Money credited to my E-Money Wallet with Bitpanda Payments GmbH; (ii) Crypto-Assets held through Bitpanda GmbH or through Bitpanda GmbH Berlin Branch ; and (iii) Stocks, ETFs and ETCs held in custody by Bitpanda Financial Services GmbH and by Bitpanda Financial Services GmbH (Berlin Branch), as additional collateral ("**Additional Collateral**").*
>
> *Additional Collateral Amount**.** The Bitpanda Platform displays the amount of Additional Collateral that I must at all times maintain - by stating: Additional Collateral [specified amount] EUR (this is referred to as ("**Additional Collateral Amount**"). For purposes of calculating the Additional Collateral Amount, (i) E-Money will be valued by reference to its nominal EUR value or EUR equivalent (ii) Crypto-Assets will be valued by reference to the EUR market value as displayed on the Bitpanda Platform less any haircut and (iii) Stocks, ETF and ETC will be valued in EUR at mid price less any haircut. Any applicable haircuts referred to in items (ii) and (iii) will be published on Bitpanda's website at https://bitpanda.com/margin-trading-stocks-additional-collateral.*
>
> *Secured Obligations. The Additional Collateral secures all claims of Bitpanda against me arising from or in connection with the Borrowing Transaction forming part of the Stocks/ETFs/ETCs Margin Trade, thus repayment of principal in the form of Borrowed Crypto-Asset forming part of the Stocks/ETFs/ETCs Margin Trade and accrued Daily Fees (the "**Secured Obligations**").*
>
> *Notification. With respect to Additional Collateral in the form of Crypto-Assets: I instruct my custodian Bitpanda GmbH , as the entity holding the Additional Collateral in the form of Crypto-Assets, to (a) henceforth hold these Crypto-Assets in custody according to Clause 12 of the Stocks/ETFs/ETCs Margin Trading Terms, (b) to designate the relevant Crypto-Assets as pledged in first rank to Bitpanda and to record this pledge in its internal systems and any account statements.*
>
> *Notification. With respect to Additional Collateral in the form of E-Money: E-Money is an electronically stored monetary value within the meaning of the Austrian E-Money Act 2010, representing a claim against Bitpanda Payments GmbH under the Bitpanda Payments Terms. With this Additional Pledge, I pledge*

to Bitpanda all present and future claims, rights and receivables against Bitpanda Payments GmbH arising from E-Money credited to my E-Money Wallet, including any redemption or repayment claim.

For perfection, I hereby instruct Bitpanda GmbH to notify Bitpanda Payments GmbH, in its capacity as third-party debtor under the E-Money constituting Additional Collateral, of this Additional Pledge and instruct Bitpanda Payments GmbH (a) to restrict any withdrawal, transfer or other disposal of the Additional Collateral except as permitted under the Stocks/ETFs/ETCs Margin Trading Terms and (b) upon receipt of a notice by Bitpanda that the Secured Obligations have become due (fällig), to dispose of the E-Money constituting Additional Collateral as instructed by Bitpanda.

Notification. With respect to Additional Collateral in the form of Stocks, ETF and ETC: I hereby instruct Bitpanda GmbH to notify Bitpanda Financial Services GmbH including Bitpanda Financial Services Berlin Branch, in its capacity as custodian of the Stocks, ETF and ETC, of this Additional Pledge and instruct Bitpanda Financial Services GmbH to (a) henceforth hold the Additional Collateral as agent also for Bitpanda as secured party under the Additional Pledge (Besitzanweisung), (b) mark the Collateral in its books and accounts as being pledged in first rank to Bitpanda (Pfandvermerk), (c) to restrict any withdrawal, transfer or other disposal of the Collateral except as permitted under the Stocks/ETFs/ETCs Margin Trading Terms and (d) upon receipt of a notice by Bitpanda that the Collateral may be enforced, to dispose of the Collateral as instructed by Bitpanda.

Permitted Disposal. *Additional Collateral may not be withdrawn or transferred except by way of a Permitted Disposal. A disposal of Additional Collateral is permitted only if, following such disposal, (i) the Additional Collateral Amount of the remaining Additional Collateral equals or exceeds the required Additional Collateral Amount, and (ii) any substitute assets in the form of E-Money, Crypto-Assets, Stocks, ETF or ETC resulting from such disposal shall, to the extent required to maintain the required Additional Collateral Amount form part of the Additional Collateral and be pledged in first rank to Bitpanda upon being recorded or credited or held in custody by the relevant Bitpanda entity (a "**Permitted Disposal**"). Where a proposed disposal does not satisfy the conditions for a Permitted Disposal, Bitpanda may reject or block the disposal in whole or in part to the extent necessary to ensure that the Additional Collateral Amount is not reduced below the required Additional Collateral Amount.*

Enforcement. The Additional Collateral may be enforced by Bitpanda once the Secured Obligations have become due (fällig) under these Stocks/ETFs/ETCs Margin Trading Terms and have not been discharged by me after their due date (Pfandreife).

Bitpanda may, at its discretion, determine which assets constituting the Additional Collateral are to be realised in satisfaction of the Secured Obligations (if the value of the Additional Collateral exceeds the Secured Obligations), provided that Bitpanda shall have due regard to my legitimate interests in making such determination.

Bitpanda may realise the Additional Collateral out-of-court (außergerichtlich) by private sale (Freihandverkauf). Any enforcement may be undertaken without the

involvement of a court, without the need to obtain a judgment and without having to institute enforcement proceedings in accordance with the Austrian Enforcement Act (Exekutionsordnung). Bitpanda may apply the proceeds – converting any EUR amount received into Crypto-Assets of the same type as the Borrowed Crypto-Asset – towards repayment of the Borrowed Crypto-Asset and accrued Daily Fees. Any surplus remaining after full discharge of Bitpanda's claims under the Borrowing Transaction shall be released or credited to me.

Release. To the extent that Bitpanda no longer has a legitimate security interest in respect of Additional Collateral, I may demand from Bitpanda the release of that Additional Collateral from the Additional Pledge."

11.2. The pledge does not transfer ownership (*Eigentum*) of the Additional Collateral to Bitpanda.

11.3. The text of the Additional Pledge Agreement (*Zusätzlicher Pfandbestellungsvertrag*) can be downloaded in the course of the customer journey and will be provided on a durable medium together with the borrowing confirmation.

12. Collateral Custody Agreement

12.1. Collateral Custody Agreement. In deviation to Clause 4 of the Crypto-Assets Terms, any Crypto-Assets pledged to Bitpanda as Additional Collateral shall be held by Bitpanda on the basis of this "Collateral Custody Agreement" (*Verwahrvertrag*). You are the legal and beneficial owner of the Additional Collateral. Bitpanda will custody (*verwahren*) your Additional Collateral on behalf and for the account of you. Collateral will – other than Crypto-Assets on the basis of the Crypto-Assets Terms – not be kept in custody in the form of a trusteeship (*Treuhandvereinbarung*).

12.2. Register of positions. Bitpanda keeps an internal (i.e., "off-chain") register of Crypto-Assets, including the Additional Collateral, held by Bitpanda on behalf and for the account of you ("Internal Ledger"). Any Transaction carried out on the Bitpanda Platform in relation to the Stocks/ETFs/ETCs Margin Trade will be recorded in the Internal Ledger.

12.3. Type of custody. Crypto-Assets are stored in a proprietary wallet solution of Bitpanda, on wallets supporting the respective Crypto-Asset. For avoidance of doubt, your Additional Collateral is not held in a separate on-chain wallet but only represents the state of Bitpanda's Internal Ledger.

12.4. Segregated Accounts and Wallets. Bitpanda will offer custodial services to all its customers and therefore acts as custodian for several customers at the same time. You herewith release Bitpanda from any restrictions against self-dealing and double representation in connection with its role as custodian and the other services offered by it on the Bitpanda Platform.

13. Security systems for Additional Collateral in the form of Crypto-Assets

13.1. Management and Storage of Additional Collateral. To enhance security, Bitpanda employs advanced cryptographic methods and secure technologies to manage and store your Crypto-Assets.

13.2. Cybersecurity and Digital Infrastructure. Bitpanda's cybersecurity framework is designed to protect its digital infrastructure from cyber threats and enhance the integrity and availability of Crypto-Assets. Bitpanda uses multi-layered cybersecurity protocols, including intrusion detection, regular security audits, and vulnerability assessments to minimise the risk of loss of Crypto-Assets. Threat detection systems are employed to monitor any suspicious activity.

13.3. Cryptographic Key Lifecycle Management. Bitpanda follows best practices for the lifecycle management of cryptographic keys, including key generation, distribution, storage, rotation, and destruction. Keys are typically generated in secure environments and may be stored using hardware security modules or other secure storage solutions. Regular key rotation and retirement processes are enforced. Access to cryptographic keys is strictly controlled and monitored, ensuring that only authorised personnel can perform key management operations.

13.4. Security Incident Response. Bitpanda has established a comprehensive security incident response plan to address potential security breaches and other incidents swiftly and effectively. This plan will be reviewed and adapted from time to time, but at least annually.

13.5. Client Notification. You will be informed as soon as reasonably possible in the event of a security incident that affects your Crypto-Assets.

14. Tax

14.1. For the purchase or sale of financial instruments such as Stocks/ETFs/ETCs via the Bitpanda Platform you may incur taxes.

14.2. Taxation related to the Borrowed Crypto-Asset is your sole responsibility. Bitpanda recommends that you consult a tax adviser, as only a tax adviser can take your individual tax situation into account. This applies in particular if you are subject to foreign tax laws or if specific personal circumstances affect your taxation.

15. Stocks/ETFs/ETCs Margin Transaction Fees

15.1. When you buy or sell Stocks/ETFs/ETCs as part of a Stocks/ETFs/ETCs Margin Trade, those buy or sell transactions (including the Buy Order, a Sell Order and the Liquidation Order) are subject to the fees of the "Financial Services Cost Transparency Document".

15.2. Daily Fee. Borrowing Crypto-Assets is subject to a Daily Fee that is charged by Bitpanda. The Daily Fee is charged every 4 hours (thus e.g. if the Daily Fee amounts to 0.18 % per day, 0.03 % will be charged every 4 hours), always counting from 00:00 CET.

15.3. You will also find the applicable Daily Fees in the Crypto-Assets Cost Transparency Document, which you can find here https://cdn.bitpanda.com/terms-and-conditions/cost-transparency-crypto-bitpanda-en-latest.pdf.

16. Liability

16.1. Any liability of Bitpanda under or in connection with its services shall be limited in accordance with Clause 10 of the User Agreement.

17. Risks for Stocks/ETFs/ETCs Margin Trades

17.1. With respect to Stocks/ETFs/ETCs, the Risk Information for Financial Instruments is available here and in addition for ETF and ETC the respective KID contains further details on the risks involved in each case.

17.2. Stocks/ETFs/ETCs Margin Trades bear additional risks that are outlined here: https://cdn.bitpanda.com/terms-and-conditions/risk-information-margin-trading-equity-bitpanda-bitpanda-gmbh-en-latest.pdf.

Annex I

Definitions

Definition	Meaning
Account	means the user account you create by registering on the Bitpanda Platform.
Additional Collateral	means E-Money Crypto Assets, Stocks, ETF and ETC pledged to Bitpanda according to Clause 11.1. and the Additional Pledge Agreement.
Additional Collateral Amount	has the meaning given to such term in Clause 11.1.
